About Me

```
name: "Aditya Waidande"
role: "Computer Science Undergraduate | Aspiring Software Engineer"
location: "India"
year: "3rd Year B.Tech / B.E."
career_goal: "Backend Software Engineer at a Top Product-Based Company"
current_focus:
  - Data Structures & Algorithms (LeetCode)
  - Python
  - SQL (PostgreSQL)
  - Backend Development
  - Git & GitHub
interests:
  - Backend Development
  - Problem Solving
  - Open Source
  - APIs & Databases
  - Software Engineering
```

- 🕒 Currently preparing for Software Engineering internships & placements
- 🔗 Deepening my knowledge of backend systems, APIs, and databases
- 🧩 Solving DSA problems daily to strengthen problem-solving skills
- 🤝 Open to collaborating on backend & open-source projects

Tech Stack

Python

C++

SQL / PostgreSQL

MySQL

Git

GitHub

Linux

VS Code

Postman

Docker

Django

FastAPI

MongoDB

Node.js

Redis

GitHub Analytics

GitHub Stats Card

Total commits, stars, PRs & issues — rendered live on GitHub via github-readme-stats.

Top Languages

Most used languages by repository composition — rendered live on GitHub.

Streak Stats

Current streak, longest streak & total contributions — rendered live on GitHub.

Contribution Activity Graph

Daily contribution activity timeline — rendered live on GitHub.

Note: These stat cards are dynamic images generated by GitHub at view-time and only render on the live GitHub profile page — not in a static PDF.

LeetCode Progress

- Actively solving problems across Arrays, Strings, DP, Trees & Graphs
- Building consistency with daily problem-solving challenges
- Full profile link included in the Contact section below

Current Goals

- 🕸 Crack SDE internships / placements at top product-based companies (Amazon, Google, Microsoft, Atlassian, Adobe, Uber, Goldman Sachs)
- 🧠 Master Data Structures & Algorithms with 300+ problems solved
- 🏠 Build and deploy scalable backend systems & REST APIs
- 📄 Strengthen database design & query optimization skills
- 🌐 Contribute actively to open-source projects
- 📜 Earn relevant backend & cloud certifications

🔪 **Fun Facts**

🕒	I debug best late at night with lo-fi beats playing
📖	I read tech blogs before checking social media
🎮	I enjoy DSA problems more than mobile games
☕	Code, coffee, repeat — my daily loop
🔄	I believe in writing clean code, not just working code

💬 **Quote**

"First, solve the problem. Then, write the code."
— John Johnson
